

Inside & Outside Cover Plates

ArcOne® produces a complete array of cover plates. Our specially designed cover plates are lightweight, but still hold up to the highest standards.

If you own a single shade filter and need a slightly darker shade for comfort, our passive shade 1 & 2 upgrades will meet your needs. ArcOne® helmets must use ArcOne® cover plates due to the helmet designs. Our cover plates may be used with all other manufacturer helmets.

Sold as a single or 10-Pack
