

Heavy-Duty Aluminum Straight Edge

Get the measurements you need easily and quickly on surfaces up to 3 feet in length using the Empire® Level 36-Inch x 1-1/8-Inch Heavy-Duty Aluminum Straight Edge. This measuring tool features inch-scale graduations that are easy to read; improved visibility of the graduations help ensure each measurement is accurate. Thanks to its aluminum construction, the Empire Level 36-inch straight edge is durable and boasts a long lifespan. Unlike wood, the aluminum won't warp, twist or bow over time, even in locations where there are fluctuations in moisture. It also features a wide frame that helps improve its strength and impact resistance. In addition to using the Empire level durable straight edge for measuring, the flat edge of the tool also makes drawing straight lines or tracing lines onto surfaces easy.

INCLUDES:

[\(1\) Heavy-Duty Aluminum Straight Edge \(403\)](#)

FEATURES:

- Heavy-duty aluminum frame for strength
- Easy-reading inch-scale graduations, allowing measurements to be more accurate
- Heavy-duty aluminum straight edge – 1 1/8" width
- 1 year limited warranty
