## CONDITIONER pHB

TANK SIDE ADDITIVE TO CONTROL BACTERIA GROWTH IN CUTTING FLUID SUMPS

### DESCRIPTION

ValCOOL's CONDITIONER pHB is a pH stabilizer designed as a tank side additive to control the growth of bacteria in cutting fluid sumps. When added to your system at a ratio of one gallon per six hundred gallons of fluid every four to six weeks, CONDITIONER pHB will help control both rancidity and corrosion while extending the life of your sump. ValCOOL CONDITIONER pHB is compatible with all fluids and is not harmful to machine components or machined parts.

### FEATURES & BENEFITS

- Effectively maintains pH
- Controls rancidity
- Extends sump life
- Compatible with coolants and hydrotest fluids
- Cost effective

### PHYSICAL DATA

<b>Appearance neat</b>	Liquid
<b>Color</b>	Amber
<b>Specific gravity</b>	1.06
<b>Pounds per gallon</b>	8.5
<b>pH, Neat</b>	9.0
<b>Flash point</b>	None
