

**WORKS FAST.
TASTES GREAT.**

3X

ELECTROLYTES
VS LEADING SPORTS DRINK

WORKS FASTER
THAN WATER ALONE

+1/2

KEY VITAMINS
FOR HEALTH & WELLNESS

DOCTOR DEVELOPED

Developed by Dr. Eduardo Dolhun during humanitarian aid missions, DripDrop was designed to provide the fastest possible hydration to those in need. Backed by six decades of ORS (oral rehydration solution) science, our formula activates a hydration shortcut, working faster and more effectively than water alone. And unlike other electrolyte drink mixes, it tastes great. DripDrop is the trusted choice for industrial athletes, first responders, professional sports teams and anyone who demands the best.

FAST HYDRATION FOR

WELLNESS

WHY WORKERS NEED HYDRATION

Dehydration on the job isn't just uncomfortable — it's a safety risk. Even mild dehydration (just 2%) can impair concentration, slow problem-solving, and increase the chance of job site accidents. More severe fluid loss (5%) can cut physical capacity by up to 30%. Staying hydrated reduces accidents, keeps productivity up, and boosts immunity — helping workers stay sharp, safe, and ready for anything.

WHAT WE'RE MADE OF MATTERS

- **3X ELECTROLYTES** vs leading sports drink*
- **LOW OSMOLARITY** enables rapid absorption
- **MAGNESIUM** supports optimal rehydration
- **ZINC, VITAMIN C** added immune support

WATER ISN'T ENOUGH

Effective hydration requires more than water — it needs sodium, the key electrolyte lost in sweat. DripDrop's doctor-developed formula delivers **3x the electrolytes and 1/2 the sugar** of the leading sports drink, accelerating fluid and electrolyte absorption. Prefer no sugar? We've got you covered with a Zero Sugar option too. DripDrop serves up a variety of award-winning flavors that taste as good as they work.
